16. Voc Rob

Monitors

Group M1: Peter
 Group M2: Rob
 Group M3: Marijn

Contact information:

Email: contact@thestacks.nl
 Peter: 06-28083344
 Rob: 06-40355518

Remarks

- The drums will be placed well in front of the amps so stagesound is not depending on monitors alone. If there is a drum riser it should be placed at least 1 meter (3,5 feet) from the back wall.
- Organ and guitar are both amplified by the same amp (VOX AC30). The noisebox is also partly fed through this amp.
- Clavinet and bass are both amplified by the same amp (HIWATT). The bass pedals are also partly fed through this amp.
- Vocal mics and stands are brought by the band in most cases.

Licht plan

The band makes dance music. The stage should be somewhat dimmed and mostly lit with static lights. The majority of the light should be aimed at the dance floor. The light plan should be more like the light plan of a dance night with a DJ, rather than a regular concert.
